Vital Statistics

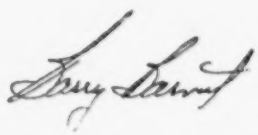
The Honourable Myra A. Freeman
Lieutenant Governor
Province of Nova Scotia

Your Honour:

I beg to present herewith the Report of the Registrar General containing the Vital Statistics of the Province for the year ending December 31, 2003.

I have the honour to be, Madam,
Your most obedient servant,



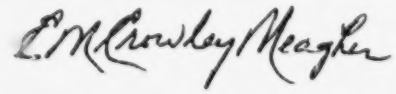
Barry Barnet
Registrar General

To The Honourable
Barry Barnet
Registrar General
Province of Nova Scotia

Sir:

I beg to present herewith the Report of the Deputy Registrar General containing the Vital Statistics of the Province for the year ending December 31, 2003.

I have the honour to be, Sir,
Your most obedient servant,



Elizabeth Crowley Meagher
Deputy Registrar General

PART I

INTRODUCTION AND HIGHLIGHTS OF STATISTICS

Introduction

The 2003 Annual Report of births, deaths, stillbirths, and marriages is compiled by the Vital Statistics Unit of Service Nova Scotia and Municipal Relations. Data on vital events occurring in Nova Scotia have been published since 1917. The information presented in the following 35 charts and tables is based upon data collected on vital event registrations.

The Vital Statistics Act *(Chapter 494 of the Revised Statutes of Nova Scotia, 1989),* requires that all births, deaths, stillbirths, domestic partnership and marriages occurring in the province be registered with the Vital Statistics Office. Vital Statistics also administers the Solemnization of Marriage Act and the Change of Name Act.

The provincial registration system serves two primary functions:

1. to obtain and preserve the documentary evidence necessary to provide individuals with official proof of the facts concerning a birth, death, stillbirth, marriage or domestic partnership; and
2. to provide information and statistics to health professionals and planners for public health surveillance, health education and promotion, epidemiological research, and health planning.

Vital Event Data

This report summarizes information on vital events that occurred in the province for Nova Scotia residents. It excludes events to non-residents except where specifically noted. Statistics relating to Nova Scotia residents who gave birth, were married or died outside the province are also excluded. Marriage statistics summarize all events that occurred in the province to either residents or non-residents.

To maintain confidentiality, identifying information for individuals is not disclosed.

At the national level, Nova Scotia Vital Statistics, along with all other Canadian provinces and territories, shares data with Statistics Canada for further compilation, analysis, reporting and comparison. Information on vital events that occur to Canadians outside their province of usual residence is made available through their publications.

Time Periods

This report covers events occurring in the calendar year 2003. Selected tables present aggregate data across a number of years.

Population Data

Population estimates were provided by Statistics Canada. Vital Statistics has used the 2001 Census population.

Medical Coding

Medical Certificates of Death and Stillbirth provide information on the immediate cause of death or stillbirth, antecedent causes giving rise to the immediate cause, and other significant conditions contributing to the death or stillbirth. The World Health Organization's International Classification of Diseases (ICD) coding scheme is used to assign the appropriate medical codes. This information is processed by Statistics Canada in Ottawa, using microfilmed images of registrations.

Since the early 1900's, the International Classification of Diseases has been revised regularly in order to reflect advances in medical science and changes in diagnostic terminology. The ninth revision of ICD (ICD-9) was used for medical coding until 1999. Coding according to the 10th revision of ICD (ICD-10) was implemented nationally as of January 1, 2000.

Acknowledgements

Vital Statistics would like to acknowledge and thank the many groups and individuals who ensure complete and accurate recording of vital events, including our division registrars of births, deaths and stillbirths located in hospitals and funeral homes, deputy issuers of marriage licenses, physicians who certify causes of death and stillbirth and the Provincial Medical Examiner's office at the Department of Justice.

Other Information and Contact Information

On a Typical Day in Nova Scotia in 2003

- **24 LIVE BIRTHS OCCURRED IN THE PROVINCE TO NOVA SCOTIA RESIDENTS:**
  - 12 males and 12 females
  - 5 babies were born every 7 days to teenage mothers
  - 9 were born to parents not married to each other
  - 2 live births were registered with no father named
  - 4 low birth weight babies were born every 3 days (< 2500 grams)
  - 1 multiple birth occurred every 3 days
  - 1 stillbirth occurred every 6 days

- **22 DEATHS OCCURRED IN THE PROVINCE TO NOVA SCOTIA RESIDENTS:**
  - 11 males and 11 females
  - 7 deaths were due to diseases of the circulatory system including:
    - 4 - deaths from heart disease
    - 2 - deaths from cerebrovascular diseases
  - 6 deaths were due to cancer including:
    - 2 - from lung cancer
  - 2 deaths were due to diseases of the respiratory system
  - 4 deaths every 5 days resulted from accident or violence
  - 3 deaths every 4 days were due to diabetes
  - 4 deaths every 7 days were due to Alzheimer's disease
  - 1 death occurred every 121 days due to AIDS/HIV infections
  - 1 infant death occurred every 8 days

- **13 MARRIAGES WERE SOLEMNIZED IN NOVA SCOTIA:**
  - 4 were civil ceremonies and 9 were performed by religious representatives
  - 9 marriages were to couples where both parties were marrying for the first time
  - 1 marriage every 40 days was to a couple where both parties were teenagers

- **1 DOMESTIC PARTNERSHIP DECLARATION WAS FILED EVERY 6 DAYS**

Summary of Vital Events

Since 1941, the population of Nova Scotia has increased by approximately 40%. Demographic and social changes have had a dramatic impact on vital events. The birth rate has fallen to less than half the rate seen in the early 1960's, yet the mortality rates have remained more or less static. The net result, in 2003, is a 'natural increase rate' of only 0.6, as the number of deaths approach the number of births each year. Emigration and immigration are not included in natural population growth rates.

- In 2003, there were 8,536 live births in Nova Scotia, to NS residents. The number of live births decreased by 9 births from 8,545 births in 2002. The birth rate is 9.1 births per 1,000 population.

- There were 7,997 deaths of Nova Scotia residents in 2003, up 76 deaths from the previous year. The 2003 death rate was 8.5 deaths per 1,000 population.

- A total of 4,738 marriages were solemnized in Nova Scotia in 2003. The marriage rate per 1,000 population has remained in the 5.1 to 5.9 range for the past five years. Marriage statistics include all marriages that took place in the province, including those where one or both parties were non Nova Scotia residents.

- There were 57 stillbirths to residents of Nova Scotia in 2003. The stillbirth rate was 6.6 per 1,000 total births (live births and stillbirths) in 2003.

- In 2003, there were 47 infant deaths (age at death less than one year) in the province, for an infant mortality rate of 5.5 per 1,000 live births. Of these 47 infant deaths, 34 were perinatal deaths, occurring to infants under one month of age. The infant death rate in the past five years has ranged from 3.7 to 5.5.

Highlights of Birth Statistics

- In 2003, there were 8,536 births to residents of Nova Scotia, of which 51.7% were males (4,417) and 48.3% were females (4,119).
- In 2003, there were 98 births in Nova Scotia to non-residents of the province.
- The vast majority of births occurred in hospital (99.6%)
- Halifax and Victoria counties experience the highest birth rate per 1,000 population at 10.4 and 9.7 respectively.
- Cumberland and Guysborough counties experience the lowest birth rate per 1,000 population at 5.8 and 5.9 respectively.
- The provincial birth rate for 2003 was 9.1 births per 1,000 population. This compares to the Canadian national birthrate of 10.5 for 2002 [1], the lowest since 1921 when vital statistics began to produce nationally. In the last 10 years the rate has dropped 25.4%.[2]
- In 2003, there were 5 births to women under the age of 15, and 457 births to women aged 15-19, for a total of 462 births to teenage mothers (age 19 and under). This represents 5.4% of all live births for 2003. There were 118 births to teenaged fathers (aged 19 or younger), or 1.4% of live births. Of the 462 births to teenaged mothers, 97 were to fathers who were also 19 years of age or younger. This means 1.1% of live births in 2003 were to couples who were both teenagers.
- In 2003, 49.8% of live births were to women aged 20-29, 42.5% of live births were to women aged 30-39, and 2.1% were to women aged 40 or older.
- In 2003, there were 112 births to parents who were both 40 years of age or older. This was 1.3 % of live births. The oldest mothers were 47 years of age and the oldest fathers were over 65.
- Of all live births in 2003, 742 or 8.7% were to fathers aged 40 or older.

ANOTHER WAY TO PRESENT THIS INFORMATION

Of every 100 live births in Nova Scotia in 2003, approximately

- 5 were to teenaged mothers aged 19 or under (462);
- 50 were to mothers aged 20-29 (4,252)
- 42 were to mothers aged 30-39 (3,632)
- 2 were to mothers aged 40-49 (178)
- 1 was to a teenaged father aged 19 or under (118)
- 33 were to fathers aged 20-29 (2,794)
- 48 were to fathers aged 30-39 (4,108)
- 8 were to fathers aged 40-49 (691)
- < 1 was to fathers aged 50-59 (49)
- <1 was to fathers aged 60 and over (2)
- 9 were to fathers whose age was not stated (774)

Highlights of Death Statistics

- In 2003, there were 7,997 deaths to residents of Nova Scotia, of which 49.7% were males (3,971) and 50.3% were females (4,026).
- Digby and Annapolis counties experience the highest death rate per 1,000 population at 13.7 and 12.6 respectively.
- Halifax and Antigonish counties experience the lowest death rate per 1,000 population at 6.8 and 7.5 respectively.
- The provincial death rate for 2003 was 8.5 deaths per 1,000 population.
- In 2003 there were 2,741 deaths due to disease of the circulatory system in Nova Scotia, which is 34.3% of all deaths. Of these:
    - 761 were due to chronic ischemic heart disease – 9.5% of all deaths
    - 651 were due to acute myocardial infarction (heart attack) – 8.1% of all deaths
    - 545 were due to cerebrovascular disease, including stroke – 6.8% of all deaths
- In 2003 there were 2,405 deaths due to malignant neoplasms (cancer) in Nova Scotia, 30.1 % of all deaths.
- In 2003, there were 368 deaths due to chronic lung diseases, (excluding asthma), 4.6% of all deaths
- In 2003 there were 326 deaths due to disease of the digestive system, including liver disease – 4.1% of all deaths
- In 2003 there were 301 deaths due to accidents and unintentional injury – 3.8% of all deaths.
- In 2003 there were 286 deaths due to diabetes - 3.6% of all deaths
- In 2003, there were 205 deaths due to influenza (9) and pneumonia (205) – 2.6% of all deaths
- In 2003, there were 97 deaths due to intentional self-harm (suicide).

Highlights of Stillbirth, Maternal Death and Infant Death Statistics

- Stillbirths are registered when a fetus is delivered where there is no breathing, beating of the heart, pulsation of the umbilical cord or unmistakable movement of voluntary muscles and is 500 grams or higher in weight or 20 or more weeks of gestation.

- In 2003, there were 57 stillbirths to mothers who were residents of Nova Scotia, which is a rate of 6.6 per 1, 000 live births.

- The Canadian national rate for stillbirth in 2002 (the last reported year) was 6.1 per 1,000 live births.[1]

- The stillbirth rate in Nova Scotia has dropped dramatically since the early 1940's, when the rate was 25.5 stillbirths per 1,000 live births.

- In the period 1941 to 1944, the maternal death rate has dropped from a high of 2.6 deaths per 1,000 live births, to zero in the past five years. Many improvements in the monitoring of pregnancy, delivery and the post-partum period and the interventions available to safeguard women in high risk pregnancies have contributed to this dramatic trend. As well, maternal nutrition and understanding of the pregnancy process has improved in the past 60 years.

- Infant deaths are those occurring to children under 1 year of age.

- In 2003, there were 47 infant deaths (age at death less than one year) in the province, for an infant mortality rate of 5.5 per 1,000 live births. Of these 47 infant deaths, 34 were perinatal deaths, occurring to infants under one month of age. The infant death rate in the past five years has ranged from 3.7 to 5.5.

- The Canadian national infant death rate for 2002 (the last reported year) was 5.4 per 1,000 live births.[2] Nova Scotia has been consistently at or below the national infant death rate.

- The leading cause of infant death is Sudden Infant Death Syndrome (SIDS) of which there were 5 cases in Nova Scotia in 2003. The leading category of causes of infant death is Certain Conditions Originating in the Perinatal Period, which includes conditions which have their origin in the perinatal period (before and during labour) even though death (or morbidity) occurs later. [3] There were 23 deaths in this category. For specific causes of death in this category, please see Table VII.

- There were 8 infant deaths attributable to congenital malformations, deformations, or chromosomal abnormalities.

There were no reported deaths in the following:

VII Diseases of the Eye and Adnexa
VIII Diseases of Ear and Mastoid Process
XV Pregnancy, Childbirth and the Puerperium
XIX Injury, Poisoning and Certain Other Consequences of External Causes
XXI Factors Influencing Health Status and Contact with health services

*Cause of death unknown at time of printing.
